

Fireplace Option 1 - Concept

Beige, cream and light brown brick/tile, with dark wood mantel to match flooring and create a contrast. This option is my personal favorite. Feels warm and cozy while still having that farm house feel.

Fireplace Option 2 - Concept

Darker brown brick tile, with a warm white mantle to contrast with the lighter tones in the space. Also could look for a brick that has some of those copper tones.

Fireplace Option 3 - Concept

Wanted to get you opinions on this option. You could put brick/tile below the mantle with a shiplap above. Added the dark wood mantle here to contrast the lighter colors.

Fireplace Option 4 - Concept

This brick/tile would be if you chose a brick similar to the lake. The uneven/random brick look. I would pair it with a white mantle.
